QUALITY!

ESTABLISHED 1973 | MUMBAI | INDIA

COMPANY PROFILE

"Industrial Brushware Industries", is a renowned manufacturer and worldwide supplier of an assortment of brushes that caters to the complete spectrum of brush requirements of an array of industries including Automobile, Construction, Metals, Heavy Engineering, Aviation, Food & Pharma. With a humble beginning in the city of Mumbai way back in 1973, we realized the need to cater to the extensive requirements and demand for brushes to clean, deburr, finish and polish. Our usage of optimum quality raw material, along with advanced technologies are in compliance with today's industry standards and what causes demand for our brushes to be so high.

Some of our in demand brush products include Spiral Wire Brushes, Nylon Spiral Brushes, Wire Stencil Brushes and Nylon Strip Brushes. Apart from these, we also offer a wide assortment of Cleaning Brushes, Tube Cleaning Brushes, Roll Brushes, Spiral Brushes and many such more.

Our brushes are easy to handle, durable and smooth in texture with thin bristles. Each and every brush is analysed, tested with firm checks and balances in place on parameters like raw material used, construction, sturdiness, durability and reliability to ensure their efficiency and credibility.

Additionally, our strong engineering team, headed by Mr. Murtuza Contractor, can offer you a complete customized solution that caters to your unique brush need and ensures you are able to utilize the product to the optimum. We have a state-of-the-art infrastructure facility with a brand new contraption from Germany for drilling, CNC, tufting, and head making that delivers minimum errors, maximum productivity ensuring continuity in ops and assurance of delivery. The organization is divided into 4 verticals of manufacturing, quality inspecting, warehousing and packaging and sales and marketing.

With distribution of products worldwide, we have set the benchmark for quality and innovation across the automobile, food, pharma, household, cleaning and industrial sectors.

In a market which has fierce competition in this field, "Industrial Brushware Industries" proudly stands ahead of their industry counterparts.

Sizes

Crimped Wire Wheel Brush	B,SS,MS,BMS,AN,NY,PP,PET	Customized as per drawing & specifications.
Twist Knot Wheel Brush	MS	Customized as per drawing & specifications.
Shaft Mounted Wheel Brush	B,SS,MS,BMS,AN,NY,PP,PET	Shaft – 6mm, Min Dia – 1", Max Dia – 3"
Stencil Wire Brush/End Brush	B,SS,MS,BMS,AN,NY,PP,PET	Shaft – 6mm, Min Dia – 10mm, Max Dia – 30mm
Cup Brush	B,SS,MS,BMS,AN,NY,PP,PET	Customized as per drawing & specifications.
Strip Brush	B,SS,MS,BMS,AN,NY,PP,PET	Customized as per drawing & specifications.
Roller Brush/Spiral Roller Brush	B,SS,MS,BMS,AN,NY,PP,PET	Customized as per drawing & specifications.
Disc Brush	B,SS,MS,BMS,AN,NY,PP,PET	Customized as per drawing & specifications.
Handle Brush	B,SS,MS,BMS,AN,NY,PP,PET	Customized as per drawing & specifications.
Tube Cleaning Brush	B,SS,MS,BMS,AN,NY,PP,PET	Customized as per drawing & specifications.

WHEEL BRUSHES

CRIMPED WIRE WHEEL BRUSH

Primarily used for removal of rust, corrosion, weld spots, paint and primer and generally to produce a clean and smooth surface. These are circular in shape and used on straight grinders for polishing, cleaning and finishing of metal, wooden, plastic or glass surfaces.

KNOTTED TWIST WHEEL BRUSH / STINGER WHEEL BRUSH

Standard Knotted Twist Wheel Brushes feature knots that are twisted approximately 75% of the length of the trim. The loosely twisted knots cover a larger surface area and are ideal for heavy-duty cleaning and surface conditioning. Ideal for weld cleaning, weld spatter removal, scale removal, cleaning, deburring and flash removal. Designed for root and hot pass weld cleaning in pipe joining applications.

SHAFT MOUNTED WHEEL BRUSH

Shaft Mounted Wheel Brushes provide lighter brushing action and superior finish when cleaning, removing rust and paint, smoothing, cleaning fettling from cast seams and light deburring. They are ideal for cleaning polishing and finishing of joints/weld joints or corners and areas that are hard to reach. The standard 6mm shaft attachment makes it an easy to use product with any hand drill.

CUP BRUSHES

CRIMPED WIRE CUP BRUSH

These Cup Brushes are used for flat brushing, edge cleaning and flash removal. Recommended for use on portable power tools to Remove paints, burrs and corrosion. Suitable for use on stationary machines and angle grinders.

KNOTTED TWIST CUP BRUSH

Used on large surfaces where a great deal of roughing is required. Good for corners and angles and removal of contaminants such as scale, concrete, slag and marine growth.

SHAFT MOUNTED CUP BRUSH

Shaft Mounted Cup Brushes are especially effective on aluminum, cast iron, brass, copper and hardened steel. Good for corners and angles and removal of contaminants such as weld spots, burr, rust and corrosion. The standard 6mm shaft attachment makes it an easy to use product with any hand held drill.

STENCIL WIRE BRUSH / END BRUSH

A member of the Cup Brush family, a typical wire end brush application includes polishing molds or dies, cleaning castings, brushing the internal surfaces of holes, flash removal, spot facing and surface polishing.

STRIP / CHANNEL BRUSHES

STRIP / CHANNEL BRUSH

Nylon Strip Brushes feature a formable metal structural element known as the channel base and nylon/metal brush fill that can be varied by trim length, density, and flexibility. A brush strip filled with nylon filament is often used as a flexible brush seal on equipment. A strip brush functions as a flexible shield and curtain against mist, dust, light, heat or intrusion into a point of operation.

ROLLER / SPIRAL BRUSHES

ROLLER BRUSH / SPIRAL ROLLER BRUSH

The offered Roll Brushes allow the user to cover the maximum angle. We offer these brushes with dense bristles, which are suitable for all kinds of surfaces. Moreover, we provide a customized solution of these brushes to our clients as per their requirements.

CLEANING BRUSHES

DISC BRUSH

Disc Brushes are the brush of choice for deburring precisely ground flat parts; saw cut parts, machined surfaces and other applications, where sharp edges need to be removed without dimensionally changing the work piece.

TUBE / TWIST IN WIRE BRUSHES

TUBE BRUSH / BOILER TUBE CLEANING BRUSHES

The Tube Brush is made of nylon, metal or abrasive nylon bristles. It is also known as a Boiler Brush. This is used for threads, pipes, holes, keyways etc. Heavy duty construction, facilitates a long service life of these brushes. Achieves optimal performance when fully chucked in drill presses and cullet-equipped portable tools.
